

Development Committee Call for Service

The Development Committee has two open committee positions to fill (three-year terms). The Development Committee oversees the SSH Fund and the philanthropic activities related of the fund. By supporting scholarships, innovation, research, and knowledge dissemination, the SSH Fund is an essential part of growing the future of healthcare simulation.

The charge of the Development Committee includes:

- Supporting the creation of a philanthropic culture within the Society.
- Design and support the development of ongoing fundraising initiatives.
- Engage and build relationships with existing and potential donors.
- Coordinate with other committees and the Board to find grants and other means of support for the SSH Fund.

Below are expectations for you to consider if you are able to make this commitment.

1. Committee meetings (virtual) are typically monthly; additional meetings may occur.
2. Support of development efforts at all Society events that you attend (IMSH, SimOps, etc).
3. Face to face meeting as scheduled/approved (SSH covers related expenses).
4. 100% Committee support of the SSH Fund is ideal and we ask Committee members to make the SSH Fund a priority in their own annual giving.
